Deliver Windows 10 Applications After End-of-Life Without Hardware Upgrades or Code Rewrites

Windows 10 support ends October 14, 2025. Organizations still relying on it face a costly and risky decision: either migrate apps and replace non-compliant hardware, or operate unsupported systems with mounting security and compliance exposure.

For regulated industries, the lack of security updates presents immediate audit and legal risks. For IT leaders, rewriting apps or refreshing hardware early strains budgets, stalls innovation, and creates user disruption.

Overview of the Solution

Sonet.io offers a third path. Instead of rewriting apps or replacing devices, Sonet.io delivers Windows 10 (and Windows 11) applications securely and instantly to any browser. There's no need to modify the app, replace hardware, or deploy infrastructure. End-users get a native experience from any device, while IT gets zero-trust security and visibility, without the VDI and VPN complexity.
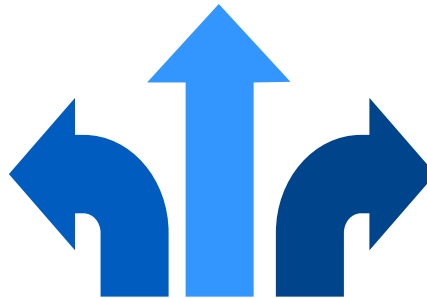

Benefits

Avoid Expensive Hardware Refreshes
Extend the life of your Windows 10 fleet. Deliver apps to non-Windows 11 devices securely via browser.

Stay Compliant Post-EOL
Protect against breaches and meet regulatory requirements with built-in zero-trust security, session recording, and DLP.

Preserve Legacy Windows 10 Applications
Run mission-critical apps without rewriting or migrating to Windows 11. No code changes. No downtime.

Key Capabilities for this Solution

- **App Delivery Without Rewrites**
  Use existing Windows 10 applications without code changes or infrastructure required.

- **Universal Browser-Based Access from Any Device** No VPNs, no endpoint agents, no proxies; just secure access from any browser.

- **Zero-Trust Security Built In**
  Fine-grained access controls, session recording, and native DLP.

- **Works with Your Existing Environment**
  Integrate with current SSO and identity tools.

- **No New Hardware Required**
  Deliver Windows 11 apps to non-compliant Windows 10 devices without upgrades.

- **Fast Setup, Minimal IT Lift**
  Onboard in under an hour. Add apps, users, and policies in minutes.

Implementation

Getting started is simple. Connect your SSO, choose the apps to deliver, and give your users a browser link. No agents. No shipping. No stress.

Why Sonet.io

With Sonet.io, IT leaders can avoid the cost and complexity of rewriting apps or replacing hardware and still deliver a secure, high-performance experience. It's everything you need to keep business moving after Windows 10 ends and nothing you don't.
